

BSA A65 Electric Starter Motor Kit

The BSA Starter Motor Kit has been designed, developed and manufactured for the BSA A65.

(Will fit all unit twin-cylinder BSA models including A65 / A50 and A75 models.)

The kit is available via our UK distributor
Shropshire Classic Motorcycles only!

ARK RACING LIMITED® BSA A65 Electric Starter Kit©

*Please note the battery is not included.

This kit is a complete replacement of the primary drive with a new case and belt drive assembly that runs dry.

*Every conceivable part is included with a new clutch shock absorber unit. You will be able to use the original clutch plates.

We are confident the kit will transform the riding experience with one-touch starting and improved transmission. The kit is built bespoke to your BSA unit twin.

The high-quality Denso starter motor is negative polarity so a regulator /rectifier will be needed for +ive earth situations.

These kits are exclusively available from
